

COME JOIN US!

Come out and join Gulf Coast Radio Control Drag Racing for an afternoon of fun and competition.

GCDRAGRACING.Com will be running regularly scheduled Radio Control Drag Racing events at Houston Motorsports Park.

The track is a 1/10 scale (132') of the full scale drag strip. We have classes for everyone involved in almost every aspect of RC Cars.

Where: Houston Motorsports Park - 11620 North Lake Houston Parkway
Houston, Texas, 77044 www.houstonmotorsportspark.com

When: [Check the web site for current race schedule and events.](#)

Classes include:

Bracket Racing - This class is based on consistency and not speed. Perfect for those monster trucks and on/off road cars sitting on the shelf collecting dust and a great way to get involved in radio control drag racing.

2.0 Index - This class is for cars running the closest to 2.0 seconds without going faster in the scaled down 1/4 mile.

Top Fuel - Dragsters reaching speeds close to 100 mph.

Funny Car / ProMod - Not for the faint at heart! These purpose built, short wheelbase cars run down the 132 foot track in less than 1.7 seconds.

- Points Racing
- Cash Purses
- Special Events
